## Molecular Basis of Disease

### Contents

#### Regular papers

- Microsomal fatty aldehyde dehydrogenase catalyzes the oxidation of aliphatic aldehyde derived from ether glycerolipid catabolism: implications for Sjögren–Larsson syndrome  
*W.B. Rizzo, E. Heinz, M. Simon and D.A. Craft (USA)* 1
- Influence of diabetes on cardiac nitric oxide synthase expression and activity  
*K. Stockklauser-Färber, T. Ballhausen, A. Laufer and P. Rösen (Germany)* 10
- Modification of the composition of polycystin-1 multi-protein complexes by calcium and tyrosine phosphorylation  
*L. Geng, C.R. Burrow, H.-P. Li and P.D. Wilson (USA)* 21
- Sustained elevation of norepinephrine depresses hepatocellular function  
*P. Wang, S.M. Tait and I.H. Chaudry (USA)* 36
- A role for linoleic acid in erythrocytes infected with plasmodium berghei  
*C.D. Fitch, G.-z. Cai and J.D. Shoemaker (USA)* 45
- CINC blockade prevents neutrophil  $\text{Ca}^{2+}$  signaling up-regulation and gut bacterial translocation in thermal injury  
*N. Fazal, M. Shamim, J. Zagorski, M.A. Choudhry, T. Ravindranath and M.M. Sayeed (USA)* 50
- Hippocampal level of neural specific adenylyl cyclase type I is decreased in Alzheimer's disease  
*M. Yamamoto, M.E. Götz, H. Ozawa, C. Luckhaus, T. Saito, M. Rösler and P. Riederer (Germany, Japan)* 60
- Does ethanol metabolism affect erythrocyte hemolysis?  
*O.V. Tyulina, M.J. Huentelman, V.D. Prokopieva, A.A. Boldyrev and P. Johnson (Russia, USA)* 69
- Stimulation of cannabinoid receptor agonist 2-arachidonylglycerol by chronic ethanol and its modulation by specific neuromodulators in cerebellar granule neurons  
*B.S. Basavarajappa, M. Saito, T.B. Cooper and B.L. Hungund (USA)* 78

#### Regular papers

- Phenotype determination of anti-GM3 positive cells in atherosclerotic lesions of the human aorta  
*Y.V. Bobryshev, R.S.A. Lord, N.K. Golovanova, E.V. Gracheva, N.D. Zvezdina and N.V. Prokazova (Australia, Russia)* 87
- Inhibitory effects of tumor necrosis factor- $\alpha$  on cationic lipid-mediated gene delivery to airway cells in vitro  
*J.E. Baatz, Y. Zou and T.R. Korfhagen (USA)* 100
- Inhibitors of advanced glycation end product-associated protein cross-linking  
*T.D. Lehman and B.J. Ortwerth (USA)* 110
- The phorbol ester PMA and cyclic AMP activate different  $\text{Cl}^-$  and  $\text{HCO}_3^-$  fluxes in C127 cells expressing CFTR  
*O. Zegarra-Moran, A.M. Porcelli and M. Rugolo (Italy)* 120
- Oligomerization of *Escherichia coli* enterotoxin b through its C-terminal hydrophobic  $\alpha$ -helix  
*V. Labrie, J. Harel and J.D. Dubreuil (Canada)* 128
- Apolipoprotein E acts to increase nitric oxide production in macrophages by stimulating arginine transport  
*C.A. Colton, M. Czapiga, J. Snell-Callanan, O.N. Chernyshev and M.P. Vitek (USA)* 134
- Acrolein inhibits respiration in isolated brain mitochondria  
*M.J. Picklo and T.J. Montine (USA)* 145
- The effect of  $\text{Pb}^{2+}$  on the structure and hydroxyapatite binding properties of osteocalcin  
*T.L. Dowd, J.F. Rosen, L. Mints and C.M. Gundberg (USA)* 153
- The measured level of prion infectivity varies in a predictable way according to the aggregation state of the infectious agent  
*J. Masel and V.A.A. Jansen (UK)* 164
- Insulin can enhance GLUT4 gene expression in 3T3-F442A cells and this effect is mimicked by vanadate but counteracted by cAMP and high glucose – potential implications for insulin resistance  
*Z.-W. Yu, J. Burén, S. Enerbäck, E. Nilsson, L. Samuelsson and J.W. Eriksson (Sweden)* 174

- Evaluation of oxidative stress during apoptosis and necrosis caused by carbon tetrachloride in rat liver  
*F. Sun, E. Hamagawa, C. Tsutsui, Y. Ono, Y. Ogiri and S. Kojo (Japan)* 186
- Differentially expressed DNA sequences following recovery from unilateral testicular torsion in rat  
*F.A. Ahmed, A.M. Jequier, J.M. Cummins and J. Whelan (Australia)* 192
- Lanthanide ions induce hydrolysis of hemoglobin-bound 2,3-diphosphoglycerate (2,3-DPG), conformational changes of globin and bidirectional changes of 2,3-DPG-hemoglobin's oxygen affinity  
*Y. Cheng, H. Lin, D. Xue, R. Li and K. Wang (People's Republic of China)* 200

### Rapid report

- Apolipoprotein E4 stimulates sulfation of glycosaminoglycans in neural cells  
*P. Bonay and J. Avila (Spain)* 217

### Reviews

- Conformational properties of serine proteinase inhibitors (serpins) confer multiple pathophysiological roles  
*S. Janciauskiene (Sweden)* 221
- Molecular requirements for the internalisation step of endocytosis: insights from yeast  
*A.L. Munn (Singapore)* 236

### Regular papers

- Identification of the protein product of the *Coch* gene (hereditary deafness gene) as the major component of bovine inner ear protein  
*T. Ikezono, A. Omori, S. Ichinose, R. Pawankar, A. Watanabe and T. Yagi (Japan)* 258
- Effects of alveolar surfactant aggregates on T-lymphocyte proliferation  
*L.-J. Yao, L.J. Fraher, R.A.W. Veldhuizen, S. Samuelson, P. Borron, J. Malloy, L. McCaig and J.F. Lewis (Canada, USA)* 266
- Stearoyl coenzyme A desaturase 1 expression and activity are increased in the liver during iron overload  
*C. Pigeon, P. Legrand, P. Leroyer, M. Bouriel, B. Turlin, P. Brissot and O. Loréal (France)* 275
- Enhanced expression of a-series gangliosides in fibroblasts of patients with peroxisome biogenesis disorders  
*K. Tatsumi, M. Saito, B. Lin, M. Iwamori, H. Ichiseki, N. Shimozawa, S. Kamoshita, T. Igarashi and Y. Sakakihara (Japan)* 285

*Author Index Vol. 1535* 294

*Contents Vol. 1535* 296
